Conceptual Models of Nursing: Global Perspectives (5th Edition) Joyce J. Fitzpatrick Ph.D. MBA RN FAAN, Ann L. Whall Ph.D. RN FAAN

Conceptual Models of Nursing will be particularly appealing to students, faculty, and nurse administrators who are interested in expanding their worldview about the current state of nursing theory from a global perspective.

A global perspective of nursing theory helps nurses think conceptually and holistically

Designed to help readers understand the development and evaluation of the theoretical base for nursing practice research and education, *Conceptual Models of Nursing* familiarizes students with a broad range of nursing models and their roles in global nursing practice. With an emphasis on the application of nursing theories for the advanced practice student, strong attention is given to the relevance of nursing theory to nursing classification systems that are used in advanced practice.

In the **Fifth Edition**, nurse scholars from several countries provide a perspective of how nursing is conceptualized in other countries and give voice to a community of scholars that extends beyond the borders of the United States. Models presented in the text represent a movement to think about nursing conceptually, away from a narrow point of view to a holistic one.
