Introduction to General Relativity, Black Holes, and Cosmology Yvonne Choquet-Bruhat

General Relativity is a beautiful geometric theory, simple in its mathematical formulation but leading to numerous consequences with striking physical interpretations: gravitational waves, black holes, cosmological models, and so on.

This introductory textbook is written for mathematics students interested in physics and physics students interested in exact mathematical formulations (or for anyone with a scientific mind who is curious to know more of the world we live in), recent remarkable experimental and observational results which confirm the theory are clearly described and no specialised physics knowledge is required. The mathematical level of Part A is aimed at undergraduate students and could be the basis for a course on General Relativity. Part B is more advanced, but still does not require sophisticated mathematics.

Based on Yvonne Choquet-Bruhat's more advanced text, *General Relativity and the Einstein Equations*, the aim of this book is to give with precision, but as simply as possible, the foundations and main consequences of General Relativity. The first five chapters from *General Relativity and the Einstein Equations* have been updated with new sections and chapters on black holes, gravitational waves, singularities, and the Reissner-Nordström and interior Schwarzschild solutions.

The rigour behind this book will provide readers with the perfect preparation to follow the great mathematical progress in the actual development, as well as the ability to model, the latest astrophysical and cosmological observations. The book presents basic General Relativity and provides a basis for understanding and using the fundamental theory.

From reader reviews:

Ruth Brown:

What do you concentrate on book? It is just for students since they're still students or that for all people in the world, the particular best subject for that? Merely you can be answered for that query above. Every person has different personality and hobby for each other. Don't to be pressured someone or something that they don't desire do that. You must know how great and important the book Introduction to General Relativity, Black Holes, and Cosmology. All type of book could you see on many resources. You can look for the internet solutions or other social media.

Louis Cline:

Information is provisions for folks to get better life, information today can get by anyone with everywhere. The information can be a information or any news even a concern. What people must be consider when those information which is in the former life are hard to be find than now is taking seriously which one is suitable to believe or which one often the resource are convinced. If you get the unstable resource then you obtain it as your main information you will have huge disadvantage for you. All of those possibilities will not happen with you if you take Introduction to General Relativity, Black Holes, and Cosmology as the daily resource information.

Becky Duncan:

Can you one of the book lovers? If so, do you ever feeling doubt when you find yourself in the book store? Try and pick one book that you find out the inside because don't determine book by its cover may doesn't work here is difficult job because you are frightened that the inside maybe not seeing that fantastic as in the outside look likes. Maybe you answer could be Introduction to General Relativity, Black Holes, and Cosmology why because the great cover that make you consider concerning the content will not disappoint a person. The inside or content will be fantastic as the outside or cover. Your reading sixth sense will directly direct you to pick up this book.

Ronald Tanaka:

Do you like reading a guide? Confuse to looking for your preferred book? Or your book seemed to be rare? Why so many query for the book? But any kind of people feel that they enjoy with regard to reading. Some people likes reading, not only science book but also novel and Introduction to General Relativity, Black Holes, and Cosmology or even others sources were given knowledge for you. After you know how the truly amazing a book, you feel would like to read more and more. Science book was created for teacher or maybe students especially. Those publications are helping them to bring their knowledge. In additional case, beside science guide, any other book likes Introduction to General Relativity, Black Holes, and Cosmology to make your spare time more colorful. Many types of book like this.
