## **Introduction to Radar Target Recognition (Radar, Sonar & Navigation) (Electromagnetics and Radar)** Peter Tait

This book text provides an overview of the radar target recognition process and covers the key techniques being developed for operational systems. It is based on the fundamental scientific principles of high resolution radar, and explains how the underlying techniques can be used in real systems, taking into account the characteristics of practical radar system designs and component limitations. It also addresses operational aspects, such as how high resolution modes would fit in with other functions such as detection and tracking.

### **From reader reviews:**

#### **Christi Ross:**

What do you in relation to book? It is not important along with you? Or just adding material if you want something to explain what yours problem? How about your free time? Or are you busy individual? If you don't have spare time to perform others business, it is make one feel bored faster. And you have free time? What did you do? Every person has many questions above. They need to answer that question because just their can do which. It said that about e-book. Book is familiar in each person. Yes, it is right. Because start from on pre-school until university need this specific Introduction to Radar Target Recognition (Radar, Sonar & Navigation) (Electromagnetics and Radar) to read.

#### **Maria Jennings:**

Now a day those who Living in the era just where everything reachable by connect with the internet and the resources inside can be true or not need people to be aware of each info they get. How many people to be smart in receiving any information nowadays? Of course the solution is reading a book. Reading a book can help individuals out of this uncertainty Information especially this Introduction to Radar Target Recognition (Radar, Sonar & Navigation) (Electromagnetics and Radar) book because book offers you rich info and knowledge. Of course the info in this book hundred per cent guarantees there is no doubt in it you probably know this.

#### **George Rodriguez:**

Is it a person who having spare time subsequently spend it whole day by watching television programs or just resting on the bed? Do you need something totally new? This Introduction to Radar Target Recognition (Radar, Sonar & Navigation) (Electromagnetics and Radar) can be the response, oh how comes? It's a book you know. You are and so out of date, spending your free time by reading in this completely new era is common not a geek activity. So what these publications have than the others?

#### **Sean Rusin:**

What is your hobby? Have you heard this question when you got students? We believe that that concern was given by teacher to their students. Many kinds of hobby, Every individual has different hobby. And also you know that little person similar to reading or as reading become their hobby. You should know that reading is very important and also book as to be the thing. Book is important thing to provide you knowledge, except your teacher or lecturer. You see good news or update in relation to something by book. Different categories of books that can you take to be your object. One of them is this Introduction to Radar Target Recognition (Radar, Sonar & Navigation) (Electromagnetics and Radar).
