Computer Algebra and Differential Equations (London Mathematical Society Lecture Note Series)

Computer Algebra and Differential Equations (London Mathematical Society Lecture Note Series)

Computer Algebra and Differential Equations (London Mathematical Society Lecture Note Series)
The Computer Algebra and Differential Equations meeting held in France in June 1992 (CADE-92) was the third of a series of biennial workshops devoted to recent developments in computer algebra systems. This book contains selected papers from that meeting. Three main topics are discussed. The first of these is the theory of D-modules. This offers an excellent way to effectively handle linear systems of partial differential equations. The second topic concerns the theoretical aspects of dynamical systems, with an introduction to Ecalle theory and perturbation analysis applied to differential equations and other nonlinear systems. The final topic is the theory of normal forms. Here recent improvements in the theory and computation of normal forms are discussed.

From reader reviews:

Samuel Lester:

Typically the book Computer Algebra and Differential Equations (London Mathematical Society Lecture Note Series) will bring you to the new experience of reading a book. The author style to clarify the idea is very unique. In case you try to find new book to read, this book very appropriate to you. The book Computer Algebra and Differential Equations (London Mathematical Society Lecture Note Series) is much recommended to you you just read. You can also get the e-book from your official web site, so you can quicker to read the book.

James Daniels:

Computer Algebra and Differential Equations (London Mathematical Society Lecture Note Series) can be one of your starter books that are good idea. Many of us recommend that straight away because this e-book has good vocabulary that may increase your knowledge in words, easy to understand, bit entertaining but nonetheless delivering the information. The author giving his/her effort to get every word into enjoyment arrangement in writing Computer Algebra and Differential Equations (London Mathematical Society Lecture Note Series) however doesn't forget the main position, giving the reader the hottest as well as based confirm resource information that maybe you can be one among it. This great information may drawn you into completely new stage of crucial imagining.

Arthur Warnick:

Is it anyone who having spare time after that spend it whole day by means of watching television programs or just telling lies on the bed? Do you need something new? This Computer Algebra and Differential Equations (London Mathematical Society Lecture Note Series) can be the response, oh how comes? It's a book you know. You are thus out of date, spending your spare time by reading in this fresh era is common not a geek activity. So what these ebooks have than the others?

Robert Murphy:

As a university student exactly feel bored for you to reading. If their teacher inquired them to go to the library or make summary for some reserve, they are complained. Just small students that has reading's soul or real their leisure activity. They just do what the instructor want, like asked to the library. They go to presently there but nothing reading really. Any students feel that studying is not important, boring and also can't see colorful photographs on there. Yeah, it is to be complicated. Book is very important in your case. As we know that on this period, many ways to get whatever we really wish for. Likewise word says, many ways to reach Chinese's country. Therefore this Computer Algebra and Differential Equations (London Mathematical Society Lecture Note Series) can make you feel more interested to read.
