**Design Thinking: New Product Development Essentials from the PDMA** Michael G. Luchs, Scott Swan, Abbie Griffin

**Develop a more systematic, human-centered, results-oriented thought process**

*Design Thinking* is the Product Development and Management Association's (PDMA) guide to better problem solving and decision-making in product development and beyond. The second in the *New Product Development Essentials* series, this book shows you how to bridge the gap between the strategic importance of design and the tactical approach of design thinking. You'll learn how to approach new product development from a fresh perspective, with a focus on systematic, targeted thinking that results in a repeatable, human-centered problem-solving process. Integrating high-level discussion with practical, actionable strategy, this book helps you re-tool your thought processes in a way that translates well beyond product development, giving you a new way to approach business strategy and more.

Design is a process of systematic creativity that yields the most appropriate solution to a properly identified problem. Design thinking disrupts stalemates and brings logic to the forefront of the conversation. This book shows you how to adopt these techniques and train your brain to see the answer to any question, at any level, in any stage of the development process.

- Become a better problem-solver in every aspect of business
- Connect strategy with practice in the context of product development
- Systematically map out your new product, service, or business
- Experiment with new thought processes and decision making strategies

You can't rely on old ways of thinking to produce the newest, most cutting-edge solutions. Product development is the bedrock of business —whether your "product" is a tangible object, a service, or the business itself — and your approach must be consistently and reliably productive. *Design Thinking* helps you internalize this essential process so you can bring value to innovation and merge strategy with reality.
