Pyrrhus Press specializes in bringing books long out of date back to life, allowing today's readers access to yesterday's treasures.

Morris Jastrow's *The Religion of Babylonia and Assyria* is an enormous and comprehensive history that examines the origins of Mesopotamian religion, which was a full-fledged institution by the 3rd millennium B.C. and continued to be important for nearly 2500 years.

From the preface:

"It requires no profound knowledge to reach the conclusion that the time has not yet come for an exhaustive treatise on the religion of Babylonia and Assyria. But even if our knowledge of this religion were more advanced than it is, the utility of an exhaustive treatment might still be questioned. Exhaustive treatises are apt to be exhausting to both reader and author; and however exhaustive (or exhausting) such a treatise may be, it cannot be final except in the fond imagination of the writer. For as long as activity prevails in any branch of science, all results are provisional. Increasing knowledge leads necessarily to a change of perspective and to a readjustment of views. The chief reason for writing a book is to prepare the way for the next one on the same subject.

In accordance with the general plan of this Series of Handbooks, it has been my chief aim to gather together in convenient arrangement and readable form what is at present known about the religion of the Babylonians and Assyrians. The investigations of scholars are scattered through a large variety of periodicals and monographs. The time has come for focusing the results reached, for sifting the certain from the uncertain, and the uncertain from the false. This work of gathering the disjecta membra of Assyriological science is essential to future progress. If I have succeeded in my chief aim, I shall feel amply repaid for the labor involved."
