Business Process Management: Theory and Applications (Studies in Computational Intelligence)

Business Process Management: Theory and Applications (Studies in Computational Intelligence)

Business Process Management (BPM) has been in existence for decades. It uses, complements, integrates and extends theories, methods and tools from other scientific disciplines like: strategic management, information technology, managerial accounting, operations management etc. During this period the main focus themes of researchers and professionals in BPM were: business process modeling, business process analysis, activity based costing, business process simulation, performance measurement, workflow management, the link between information technology and BPM for process automation etc. More recently the focus moved to subjects like Knowledge Management, Enterprise Resource Planning (ERP) Systems, Service Oriented Architectures (SOAs), Process Intelligence (PI) and even Social Networks. In this collection of papers we present a review of the work and the outcomes achieved in the classic BPM fields as well as a deeper insight on recent advances in BPM. We present a review of business process modeling and analysis and we elaborate on issues like business process quality and process performance measurement as well as their link to all other organizational aspects like human resources management, strategy, information technology (being SOA, PI or ERP), other managerial systems, job descriptions etc. We also present recent advances to BPR tools with special focus on information technology, workflow, business process modeling and human resources management tools. Other chapters elaborate on the aspect of business process and organizational costing and their relationship to business process analysis, organizational change and reorganization. In the final chapters we present some new approaches that use fuzzy cognitive maps and a recently developed software tool for scenario creation and simulation in strategic management, business process management, performance measurement and social networking.

The audience of this book is quite wide. The first chapters can be read by professionals, academics and students who want to get some basic insight into the BPM field whereas the remaining present more elaborate and state of the art concepts methodologies and tools for an audience of a more advanced level.

From reader reviews:

Patricia French:

Have you spare time for any day? What do you do when you have much more or little spare time? Sure, you can choose the suitable activity intended for spend your time. Any person spent their very own spare time to take a walk, shopping, or went to the actual Mall. How about open or read a book eligible Business Process Management: Theory and Applications (Studies in Computational Intelligence)? Maybe it is for being best activity for you. You already know beside you can spend your time together with your favorite's book, you can cleverer than before. Do you agree with its opinion or you have different opinion?

Herbert Willams:

Reading a e-book can be one of a lot of activity that everyone in the world enjoys. Do you like reading book therefore. There are a lot of reasons why people enjoy it. First reading a reserve will give you a lot of new data. When you read a reserve you will get new information simply because book is one of many ways to share the information or perhaps their idea. Second, reading a book will make an individual more imaginative. When you reading a book especially hype book the author will bring you to imagine the story how the figures do it anything. Third, you may share your knowledge to other people. When you read this Business Process Management: Theory and Applications (Studies in Computational Intelligence), you could tells your family, friends along with soon about yours e-book. Your knowledge can inspire the others, make them reading a publication.

Jean Fair:

Do you really one of the book lovers? If so, do you ever feeling doubt when you find yourself in the book store? Attempt to pick one book that you never know the inside because don't judge book by its handle may doesn't work this is difficult job because you are frightened that the inside maybe not because fantastic as in the outside seem likes. Maybe you answer can be Business Process Management: Theory and Applications (Studies in Computational Intelligence) why because the fantastic cover that make you consider with regards to the content will not disappoint a person. The inside or content is fantastic as the outside as well as cover. Your reading 6th sense will directly guide you to pick up this book.

Luis Gonzalez:

Reading a book make you to get more knowledge from the jawhorse. You can take knowledge and information from your book. Book is prepared or printed or descriptive from each source which filled update of news. In this modern era like right now, many ways to get information are available for you actually. From media social like newspaper, magazines, science reserve, encyclopedia, reference book, book and comic. You can add your understanding by that book. Are you ready to spend your spare time to open your book? Or just searching for the Business Process Management: Theory and Applications (Studies in Computational Intelligence) when you needed it?
