El universo no es plano (Spanish Edition) Miguel Pedrero

Los viajes de los grandes navegantes como Colón, Magallanes o Elcano hicieron a la sociedad de la época rendirse ante la evidencia de que la Tierra no era plana. Los hechos corroboraron una teoría que los sistemas de creencias de la época rechazaban por su heterodoxia. En el siglo XXI, la física cuántica propone una ruptura similar, afirmando con la teoría de cuerdas que en nuestro universo hay dimensiones de la realidad que escapan a nuestra percepción y que, teóricamente, es posible saltar de unas a otras y, por lo tanto, viajar más allá de los límites del espacio y del tiempo que conocemos.

Miguel Pedrero, redactor y reportero de la revista Año Cero, nos acerca a estos nuevos paradigmas con un lenguaje sencillo y ameno, y nos invita a revisarlos a la luz de muchos de los fenómenos que, permaneciendo aún sin explicar por la comunidad científica, encajan en estos hipotéticos modelos del salto entre dimensiones.

*¿Son los ovnis, las apariciones milagrosas o las comunicaciones con personas fallecidas ejemplos de visitantes de otros planos de la realidad?

*¿Son el sueño lúcido, el viaje astral u otros estados alterados de consciencia nuestros vehículos interdimensionales?

*¿Son la telepatía y la precognición pruebas de que el espacio-tiempo no son límites para el ser humano)?

*¿Evidencian estos fenómenos que el universo y la realidad no son como todavía algunos nos quieren seguir contando?
