Utilization of high sulfur coals is becoming increasingly difficult in view of tighter environmental regulations being imposed around the world. To meet the challenge of utilizing high sulfur coals without damaging the environment, many scientists and engineers around the world are engaged in developing novel technologies. In the U.S.A. alone, the federal government has spent about five billion dollars to achieve that goal.

This conference, like its predecessors, emphasizes desulfurization with papers on physical and chemical cleaning as well as post-treatment and fluid-bed combustion technologies. Of the 45 papers submitted, 15 papers deal with physical cleaning and 7 deal with chemical cleaning of coal, suggesting that a major emphasis is still be placed on pre-cleaning of coal. The post-treatment technologies, being developed with the support of U.S. federal and state government agencies, emphasize removal of both SO<sub>x</sub> and NO<sub>x</sub> gases.

The book will be of particular interest and benefit to researchers, graduate students and other people involved in coal processing, characterization and utilization; public policy making and administration related to energy conservation, economic development, and environmental protection; and investors in industry and new technology.

Because start from on kindergarten until university need that Processing and Utilization of High-Sulfur Coals V: Proceedings of the Fifth International Conference on Processing and Utilization of High-Sulfur Coals, ... U.S.A.: 5th (Coal Science and Technology) to read.

**Jo Villegas:**

Are you kind of stressful person, only have 10 or perhaps 15 minute in your moment to upgrading your mind expertise or thinking skill actually analytical thinking? Then you are experiencing problem with the book when compared with can satisfy your short space of time to read it because all this time you only find book that need more time to be examine. Processing and Utilization of High-Sulfur Coals V: Proceedings of the Fifth International Conference on Processing and Utilization of High-Sulfur Coals, ... U.S.A.: 5th (Coal Science and Technology) can be your answer as it can be read by anyone who have those short time problems.

**Pearlie Wong:**

In this period globalization it is important to someone to obtain information. The information will make someone to understand the condition of the world. The fitness of the world makes the information better to share. You can find a lot of references to get information example: internet, classifieds, book, and soon. You can observe that now, a lot of publisher in which print many kinds of book. The actual book that recommended to you personally is Processing and Utilization of High-Sulfur Coals V: Proceedings of the

Fifth International Conference on Processing and Utilization of High-Sulfur Coals, ... U.S.A.: 5th (Coal Science and Technology) this guide consist a lot of the information of the condition of this world now. This book was represented just how can the world has grown up. The vocabulary styles that writer require to explain it is easy to understand. The writer made some investigation when he makes this book. This is why this book suitable all of you.
