The Economics of Fire Protection Ganapathy Ramachandran

This important new book, the first of its kind in the fire safety field, discusses the economic problems faced by decision-makers in the areas of fire safety and fire precautions. The author considers the theoretical aspects of cost-benefit analysis and other relevant economic problems with practical applications to fire protection systems. Clear examples are included to illustrate these techniques in action.

The work covers:

- * the performance and effectiveness of passive fire protection measures such as structural fire resistance and means of escape facilities, and active systems such as sprinklers and detectors
- * the importance of educating for better understanding and implementation of fire prevention through publicity campaigns and fire brigade operations
- * cost-benefit analysis of fire protection measures and their combinations, taking into account trade-offs between these measures.

The book is essential reading for consultants and academics in construction management, economics and fire safety, as well as for insurance and risk management professionals.
