## **The Theory of Neutron Slowing Down in Nuclear Reactors: International Series of Monographs in Nuclear Energy** Joel H. Ferziger, P. F. Zweifel

The Theory of Neutron Slowing Down in Nuclear Reactors focuses on one facet of nuclear reactor design: the slowing down (or moderation) of neutrons from the high energies with which they are born in fission to the energies at which they are ultimately absorbed. In conjunction with the study of neutron moderation, calculations of reactor criticality are presented. A mathematical description of the slowing-down process is given, with particular emphasis on the problems encountered in the design of thermal reactors.

This volume is comprised of four chapters and begins by considering the problems of neutron moderation and their importance in all types of reactors. An asymptotic reactor model is described, and the calculation of the elastic scattering frequency is explained. Subsequent chapters focus on the process of slowing down in finite and infinite medium by analyzing capture by individual resonances; resonance integrals in heterogeneous systems; the slowing-down kernels; the spherical harmonics method; statistical methods; and small source theory. The final chapter presents numerical solutions of the Boltzmann equation and covers topics such as the multigroup approach, group constants, and solution of the multigroup equations. This book will be a useful resource for nuclear physicists and engineers.

**From reader reviews:**

**Julia Hayes:**

As people who live in the particular modest era should be change about what going on or info even knowledge to make them keep up with the era that is always change and make progress. Some of you maybe can update themselves by examining books. It is a good choice to suit your needs but the problems coming to anyone is you don't know which one you should start with. This The Theory of Neutron Slowing Down in Nuclear Reactors: International Series of Monographs in Nuclear Energy is our recommendation to help you keep up with the world. Why, as this book serves what you want and need in this era.

**Edward Apodaca:**

Now a day those who Living in the era just where everything reachable by connect to the internet and the resources within it can be true or not call for people to be aware of each info they get. How individuals to be smart in obtaining any information nowadays? Of course the correct answer is reading a book. Studying a book can help persons out of this uncertainty Information specially this The Theory of Neutron Slowing Down in Nuclear Reactors: International Series of Monographs in Nuclear Energy book as this book offers you rich information and knowledge. Of course the details in this book hundred per-cent guarantees there is no doubt in it everbody knows.

**Kenton Marshall:**

Is it a person who having spare time and then spend it whole day by means of watching television programs or just resting on the bed? Do you need something totally new? This The Theory of Neutron Slowing Down in Nuclear Reactors: International Series of Monographs in Nuclear Energy can be the respond to, oh how comes? It's a book you know. You are so out of date, spending your spare time by reading in this fresh era is common not a geek activity. So what these ebooks have than the others?

**Beulah Scherr:**

A number of people said that they feel bored when they reading a e-book. They are directly felt the idea when they get a half elements of the book. You can choose typically the book The Theory of Neutron Slowing Down in Nuclear Reactors: International Series of Monographs in Nuclear Energy to make your personal reading is interesting. Your own skill of reading proficiency is developing when you including reading. Try to choose simple book to make you enjoy to learn it and mingle the sensation about book and studying especially. It is to be initial opinion for you to like to wide open a book and learn it. Beside that the publication The Theory of Neutron Slowing Down in Nuclear Reactors: International Series of Monographs in Nuclear Energy can to be a newly purchased friend when you're experience alone and confuse using what must you're doing of these time.
