Treasure Baskets and Heuristic Play (Professional Development) Sally Featherstone

Heuristic Play is a tightly described, but freely accessed activity, using a specific range of 'found' or everyday objects, and, in its pure sense, is only really applicable to a specific age range (from 12 months to about two and a half).

However, there is now plenty of evidence that heuristic play has continuing value for children throughout the Foundation Stage and well into the primary years. Collections of objects, carefully selected and offered in both adult-led and child-initiated sessions, indoors and outside, can build on the experience of treasure baskets

In this informative and helpful book you will find further information on the process of using both treasure baskets and heuristic play with babies and young children. You will also find chapters which explore the benefits of heuristic play with objects for children throughout the early years from six months to seven years. Of course, the materials, the provision and the adult role will develop and change as children mature, so this book also gives guidance on how heuristic play itself should change to meet the needs of children at different stages of development.
