James Smith

Science and Technology for Development (Development Matters) James Smith

How can science realize its potential and help us tackle global inequality, environmental change and crippling poverty? How can more appropriate technologies be developed for those most in need? Science has long promised much -- new crops, new medicines, new sources of energy, new means of communication -- but the potential of new technologies has frequently bypassed the poorest people and the poorest countries. In *Science and Technology for Development*, James Smith explores the complex relationship between society and technology, and the potential for science to make sustainable contributions to global development. Drawing on case studies from Africa, Latin America and Asia, the author argues that we need to think carefully about science and development, otherwise the perpetual promise of future technological breakthroughs may simply work to distance meaningful development from the present. This book is essential reading for all students of development.

From reader reviews:

David Wolverton:

Information is provisions for those to get better life, information today can get by anyone on everywhere. The information can be a information or any news even a problem. What people must be consider when those information which is inside former life are challenging to be find than now could be taking seriously which one would work to believe or which one the particular resource are convinced. If you obtain the unstable resource then you buy it as your main information it will have huge disadvantage for you. All of those possibilities will not happen throughout you if you take Science and Technology for Development (Development Matters) as your daily resource information.

Michael Cardona:

This Science and Technology for Development (Development Matters) is new way for you who has attention to look for some information as it relief your hunger of knowledge. Getting deeper you onto it getting knowledge more you know or else you who still having little digest in reading this Science and Technology for Development (Development Matters) can be the light food for you personally because the information inside this book is easy to get through anyone. These books develop itself in the form that is reachable by anyone, that's why I mean in the e-book web form. People who think that in guide form make them feel sleepy even dizzy this guide is the answer. So you cannot find any in reading a reserve especially this one. You can find what you are looking for. It should be here for anyone. So , don't miss that! Just read this e-book type for your better life and also knowledge.

Ralph Humphries:

With this era which is the greater particular person or who has ability in doing something more are more precious than other. Do you want to become one of it? It is just simple solution to have that. What you must do is just spending your time almost no but quite enough to possess a look at some books. One of the books in the top checklist in your reading list is definitely Science and Technology for Development (Development Matters). This book which is qualified as The Hungry Inclines can get you closer in turning out to be precious person. By looking up and review this reserve you can get many advantages.

Amy Joshi:

As a student exactly feel bored to be able to reading. If their teacher questioned them to go to the library or even make summary for some publication, they are complained. Just small students that has reading's heart or real their interest. They just do what the instructor want, like asked to the library. They go to generally there but nothing reading seriously. Any students feel that looking at is not important, boring and can't see colorful pictures on there. Yeah, it is to be complicated. Book is very important in your case. As we know that on this age, many ways to get whatever you want. Likewise word says, ways to reach Chinese's country. So , this Science and Technology for Development (Development Matters) can make you truly feel more

interested to read.
