Foundations of Predictive Analytics (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series)

James Wu, Stephen Coggeshall

Foundations of Predictive Analytics (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series) James Wu, Stephen Coggeshall

Drawing on the authors' two decades of experience in applied modeling and data mining, **Foundations of Predictive Analytics** presents the fundamental background required for analyzing data and building models for many practical applications, such as consumer behavior modeling, risk and marketing analytics, and other areas. It also discusses a variety of practical topics that are frequently missing from similar texts.

The book begins with the statistical and linear algebra/matrix foundation of modeling methods, from distributions to cumulant and copula functions to Cornish–Fisher expansion and other useful but hard-to-find statistical techniques. It then describes common and unusual linear methods as well as popular nonlinear modeling approaches, including additive models, trees, support vector machine, fuzzy systems, clustering, naïve Bayes, and neural nets. The authors go on to cover methodologies used in time series and forecasting, such as ARIMA, GARCH, and survival analysis. They also present a range of optimization techniques and explore several special topics, such as Dempster–Shafer theory.

An in-depth collection of the most important fundamental material on predictive analytics, this self-contained book provides the necessary information for understanding various techniques for exploratory data analysis and modeling. It explains the algorithmic details behind each technique (including underlying assumptions and mathematical formulations) and shows how to prepare and encode data, select variables, use model goodness measures, normalize odds, and perform reject inference.

Web Resource

The book's website at www.DataMinerXL.com offers the DataMinerXL software for building predictive models. The site also includes more examples and information on modeling.

From reader reviews:

Michelle Sanders:

The book Foundations of Predictive Analytics (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series) has a lot details on it. So when you make sure to read this book you can get a lot of profit. The book was written by the very famous author. Tom makes some research just before write this book. This book very easy to read you will get the point easily after scanning this book.

Jesus Loveless:

Why? Because this Foundations of Predictive Analytics (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series) is an unordinary book that the inside of the book waiting for you to snap this but latter it will zap you with the secret the item inside. Reading this book alongside it was fantastic author who all write the book in such wonderful way makes the content on the inside easier to understand, entertaining means but still convey the meaning completely. So , it is good for you for not hesitating having this nowadays or you going to regret it. This unique book will give you a lot of gains than the other book have got such as help improving your talent and your critical thinking method. So , still want to postpone having that book? If I were being you I will go to the e-book store hurriedly.

Patricia Steele:

Reading a book being new life style in this season; every people loves to read a book. When you go through a book you can get a lot of benefit. When you read books, you can improve your knowledge, simply because book has a lot of information upon it. The information that you will get depend on what types of book that you have read. In order to get information about your study, you can read education books, but if you want to entertain yourself look for a fiction books, such us novel, comics, along with soon. The Foundations of Predictive Analytics (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series) will give you new experience in reading a book.

Michael Gage:

Many people spending their time by playing outside along with friends, fun activity with family or just watching TV all day long. You can have new activity to pay your whole day by reading through a book. Ugh, do you think reading a book can actually hard because you have to use the book everywhere? It all right you can have the e-book, getting everywhere you want in your Smart phone. Like Foundations of Predictive Analytics (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series) which is obtaining the e-book version. So , why not try out this book? Let's find.
