## Microfluidic Devices for Biomedical Applications (Woodhead Publishing Series in Biomaterials)

Microfluidics or lab-on-a-chip (LOC) is an important technology suitable for numerous applications from drug delivery to tissue engineering. Microfluidic devices for biomedical applications discusses the fundamentals of microfluidics and explores in detail a wide range of medical applications.

The first part of the book reviews the fundamentals of microfluidic technologies for biomedical applications with chapters focussing on the materials and methods for microfabrication, microfluidic actuation mechanisms and digital microfluidic technologies. Chapters in part two examine applications in drug discovery and controlled-delivery including micro needles. Part three considers applications of microfluidic devices in cellular analysis and manipulation, tissue engineering and their role in developing tissue scaffolds and stem cell engineering. The final part of the book covers the applications of microfluidic devices in diagnostic sensing, including genetic analysis, low-cost bioassays, viral detection, and radio chemical synthesis.

Microfluidic devices for biomedical applications is an essential reference for medical device manufacturers, scientists and researchers concerned with microfluidics in the field of biomedical applications and life-science industries.

- Discusses the fundamentals of microfluidics or lab-on-a-chip (LOC) and explores in detail a wide range of medical applications
- Considers materials and methods for microfabrication, microfluidic actuation mechanisms and digital microfluidic technologies
- Considers applications of microfluidic devices in cellular analysis and manipulation, tissue engineering and their role in developing tissue scaffolds and stem cell engineering

### **From reader reviews:**

#### **Martin Adams:**

Book is actually written, printed, or descriptive for everything. You can realize everything you want by a guide. Book has a different type. We all know that that book is important point to bring us around the world. Next to that you can your reading talent was fluently. A publication Microfluidic Devices for Biomedical Applications (Woodhead Publishing Series in Biomaterials) will make you to always be smarter. You can feel much more confidence if you can know about every thing. But some of you think which open or reading some sort of book make you bored. It isn't make you fun. Why they are often thought like that? Have you trying to find best book or appropriate book with you?

#### **Larry Jones:**

The experience that you get from Microfluidic Devices for Biomedical Applications (Woodhead Publishing Series in Biomaterials) is the more deep you looking the information that hide in the words the more you get interested in reading it. It doesn't mean that this book is hard to recognise but Microfluidic Devices for Biomedical Applications (Woodhead Publishing Series in Biomaterials) giving you buzz feeling of reading. The article writer conveys their point in certain way that can be understood by means of anyone who read the item because the author of this e-book is well-known enough. That book also makes your current vocabulary increase well. Making it easy to understand then can go to you, both in printed or e-book style are available. We recommend you for having this Microfluidic Devices for Biomedical Applications (Woodhead Publishing Series in Biomaterials) instantly.

#### **Sylvia Langley:**

In this era which is the greater particular person or who has ability to do something more are more treasured than other. Do you want to become one of it? It is just simple method to have that. What you must do is just spending your time not much but quite enough to possess a look at some books. One of several books in the top collection in your reading list is usually Microfluidic Devices for Biomedical Applications (Woodhead Publishing Series in Biomaterials). This book and that is qualified as The Hungry Hills can get you closer in becoming precious person. By looking upward and review this guide you can get many advantages.

#### **Jessica Bradburn:**

Reading a book make you to get more knowledge from this. You can take knowledge and information from your book. Book is composed or printed or illustrated from each source in which filled update of news. Within this modern era like today, many ways to get information are available for an individual. From media social just like newspaper, magazines, science e-book, encyclopedia, reference book, novel and comic. You can add your knowledge by that book. Ready to spend your spare time to open your book? Or just in search of the Microfluidic Devices for Biomedical Applications (Woodhead Publishing Series in Biomaterials) when you desired it?
