Statistical Computing with R (Chapman & Hall/CRC The R Series) Maria L. Rizzo

Computational statistics and statistical computing are two areas that employ computational, graphical, and numerical approaches to solve statistical problems, making the versatile R language an ideal computing environment for these fields. One of the first books on these topics to feature R, **Statistical Computing with R** covers the traditional core material of computational statistics, with an emphasis on using the R language via an examples-based approach. Suitable for an introductory course in computational statistics or for self-study, it includes R code for all examples and R notes to help explain the R programming concepts.

After an overview of computational statistics and an introduction to the R computing environment, the book reviews some basic concepts in probability and classical statistical inference. Each subsequent chapter explores a specific topic in computational statistics. These chapters cover the simulation of random variables from probability distributions, the visualization of multivariate data, Monte Carlo integration and variance reduction methods, Monte Carlo methods in inference, bootstrap and jackknife, permutation tests, Markov chain Monte Carlo (MCMC) methods, and density estimation. The final chapter presents a selection of examples that illustrate the application of numerical methods using R functions.

Focusing on implementation rather than theory, this text serves as a balanced, accessible introduction to computational statistics and statistical computing.

From reader reviews:

Marcy Madison:

Typically the book Statistical Computing with R (Chapman & Hall/CRC The R Series) has a lot associated with on it. So when you make sure to read this book you can get a lot of profit. The book was published by the very famous author. The author makes some research ahead of write this book. This kind of book very easy to read you can obtain the point easily after scanning this book.

James Furlow:

Are you kind of stressful person, only have 10 as well as 15 minute in your moment to upgrading your mind proficiency or thinking skill also analytical thinking? Then you are experiencing problem with the book compared to can satisfy your small amount of time to read it because all of this time you only find reserve that need more time to be learn. Statistical Computing with R (Chapman & Hall/CRC The R Series) can be your answer because it can be read by you who have those short spare time problems.

Simona Vela:

Reading a book to get new life style in this yr; every people loves to study a book. When you learn a book you can get a great deal of benefit. When you read publications, you can improve your knowledge, mainly because book has a lot of information upon it. The information that you will get depend on what sorts of book that you have read. If you need to get information about your analysis, you can read education books, but if you act like you want to entertain yourself read a fiction books, this kind of us novel, comics, in addition to soon. The Statistical Computing with R (Chapman & Hall/CRC The R Series) will give you new experience in studying a book.

Estella Pierre:

Book is one of source of information. We can add our know-how from it. Not only for students but native or citizen will need book to know the change information of year to year. As we know those guides have many advantages. Beside we add our knowledge, can bring us to around the world. With the book Statistical Computing with R (Chapman & Hall/CRC The R Series) we can have more advantage. Don't one to be creative people? Being creative person must choose to read a book. Simply choose the best book that ideal with your aim. Don't be doubt to change your life with that book Statistical Computing with R (Chapman & Hall/CRC The R Series). You can more inviting than now.
